

# **District Anchor Summary (2025) Kespukwitk • K'jipuktuk • Chedabucto**

The Living Line interprets surnames by district first. These three uncaded districts form the geographic backbone of the lineage:

## **1. Kespukwitk (Southwest)**

Earliest Native-settled mixed families appear here through early ledgers and road records — the oldest continuity signals.

## **2. K'jipuktuk (Preston–Halifax Corridor)**

The maternal stronghold including Lake Loon and Cherry Brook. Native-linked presence predates refugee consolidation.

This corridor is the center of the Living Line.

## **3. Chedabucto (Eastern Shore)**

Early coastal settlements show Native-mixed families who were later reclassified. Patterns represent label drift, not migration.

## **Summary:**

Across all three districts, families show Native descriptors, land continuity, and reclassification during the refugee-consolidation era. These patterns verify pre-refugee Native presence and establish the structural map for the Living Line.
